

FCC Commissioners
The Federal Communications Commission RE: Docket 04-435
445 12th Street, SW
Washington, DC 20554

Dear FCC Commissioners ,

I am writing to voice my concerns about the FCC's proposal to relax the restrictions on the use of cell phones on airplanes in flight.

There is no hard evidence that cell phone use doesn't interfere with navigational instruments. The introduction of cell phone use in the cabin will not only increase tension among passengers, it will compromise flight attendants' ability to maintain order in an emergency. Cell phone use could also enable terrorists to coordinate a plan of action more effectively.

The FCC has very strict laws, some of which I do not approve of, but if there is one thing that you need to be strict on, it is this. This is a no win situation for anybody. I would rather some people be inconvenienced on an airplane than everyone on board be at risk. And whose to say it doesn't interfere with the airline frequencies? Cell phones can pick up cordless phone frequencies, and they are not nearly as strong as the airline equipment.

Please do not put people and lives at risk by allowing cellular phones on aircrafts. I think they should only be used by airplane personell. Most airlines already have telephones in the back of headrests that can be used by passengers which can be used if a passenger deems neccesary.

Please leave the current rules in effect.

Sincerely,

Elizabeth Fisher
